Cloud Computing

Access your data from anywhere.

www.bizmaxsoftware.com

Payroll. Automate payroll processing, equip staff to handle complex and changing payroll requirements, and offer better service to employees while reducing necessary overhead costs.

Password control. Set up multi user access with various password restriction levels.

Payslip. Automatically calculates all the income, deductions & company contributions according to your requirements. You can view the pay slips with the net salary on screen before you print cheques & generate electronic bank transfer files.

Time & attendance integration. Bizmax is all set to integrate with attendance tracking machine.

Notifications. Bizmax will show the notification on expiry of an employee's labour card, passport etc. Also show notification on leave applications & approval for leave which is given by the authority.

Employee profile. Bizmax HR Software gives HR Managers access to employee profiles, to drive collaborative and informed HR decision making.

Attachments. The attachment feature in Bizmax Payroll further enhances the HR manager's ability to maintain comprehensive employee records. Hard-copy documentation such as employee resumes, accreditation or sick leave certificates can be attached to individual records, making them readily accessible in the future.

WPS (Wage Protection System) Bizmax provides a robust & easy to use HR & Payroll system that is configured to the mandated WPS requirements of Middle East.

Human resource management. Make fast strategy decisions for attracting and retaining top talent, and offer employees better services and programs with the customizable hiring process, scheduling and performance of evaluation tools.

Time sheet. Different time sheets can be configured in the system (daily, weekly, biweekly)

Leave processing. Bizmax HR & Payroll keeps accurate leave records/history for all your employees & leave types. You can process all types & can be assured that your employees receive leave pay calculated in accordance to the law.

Transportation. Management of the vehicles details, documents, contract, schedules, maintenance as well as the drivers details and assignments.
