TABLE MAP

The Table Map provides user friendly graphical interface to view and manage status of all tables for easy table reservation, checking of availability etc.

KOT PRINTING

Designed for sending one order to a single or multiple KOT printers based on the type of dishes in the order. Ability to send edit and cancel messages to the kitchen.

WATER TABLET ORDERING

Bizmax Handheld enables to take an order at the table with the order automatically printed in the kitchen. Provision to print bills from the Handheld, retrieve previously ordered items for a selected table etc.

E-MENU

Sleek and easy-to-use Android/ iOS tablets that you can use to replace your outdated paper menus of yesteryear and provide guests with attractive electronic menu with optional guest ordering mode.

ITEM ALERT LEVELS

Item Alert Levels can be set on any number of products before the start of trade. This feature is mainly used when there are a certain number of items available for sale and you wish to notify the waiter how many items are available to sell.

HR & PAYROLL

Equipped to deal with HR & Payroll functions such as managing employee data, attendance recording, shift management, payslip generations etc. Provision to integrate with Time and Attendance system.

REPORTS & STATISTICS

Easy tool to generate various periodical reports and statistics on sales, purchases, inventory, profit and loss statements etc. Reports can be generated on daily, weekly, monthly, quarterly, semi-annually and annually basis.

LOYALTY MANAGEMENT

Bizmax provides an integrated solution that has the ability to implement gift cards and loyalty programs for restaurants and chains.

STOCK CONTROL

Strong real time inventory and stock control system with the ability to stock transfer, purchase orders generation, ingredients inventory etc. for a single or multi location setup.
