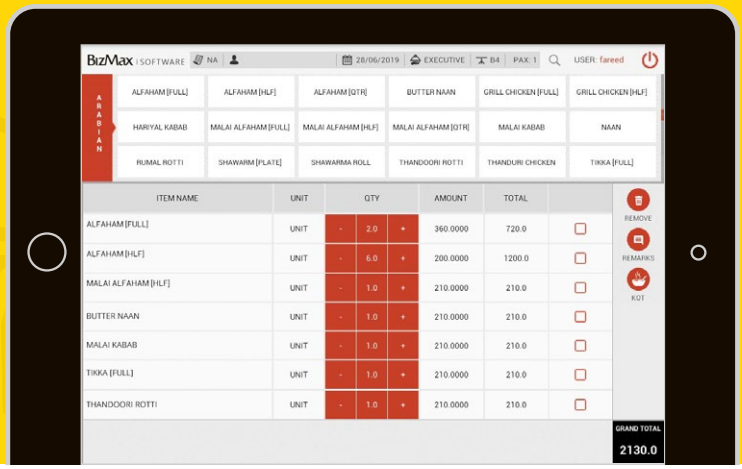
It's an easy to use, all-inclusive menu & ordering system. Take orders directly from your tablet menu and integrate your menu with your POS and kitchenprinter to streamline your ordering process!

- Menu List
- Food Ordering
- Quick Billing



ONLINE DELIVERY APP

As demand for online ordering grows among restaurant consumers, so has the need for independent restaurants to find solutions that let customers browse their menus, select options and pay for their carryout or delivery orders online. It is nowadays essential to let you input your menu information to create a simple ordering platform you can include on your own mobile app.

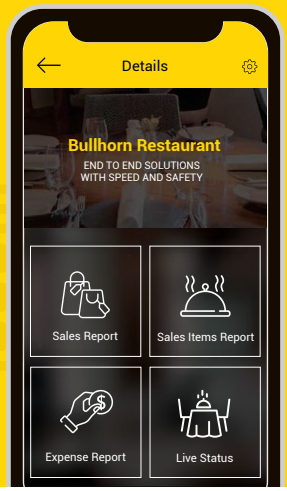
- Fast Delivery
- Coupons & Offers
- Quick Checkout
- Push Notifications

SALES INSIGHT APP

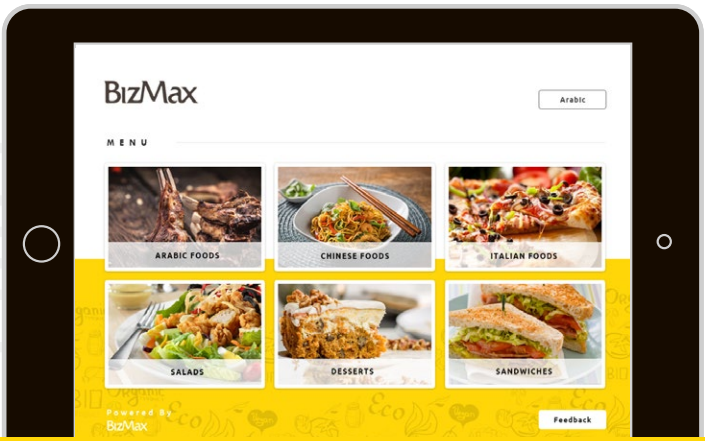
Fondly called the 'Owner App', this module is built in the form of a mobile application that is integrated with the parent software. It is your entire sales data 'in motion' which is built to provide a seamless experience to those whoever be interested in monitoring the sales of their business throughout the day of operation.

- Business Tracking
- Single/Multi-Outlet Stores
- Live Hotel Status

The report data is available is under four heads — Sales Report, Sales Items report, Expense Report and Live Status.



DIGITAL MENU

Digital Menu is a paperless technological replacement to the erstwhile complex process of writing down the orders manually, rushing towards the kitchen and running back to deliver the item.


- Menu List
- Price List
- Customer Feedback
